

1. Why did you decide to stand for election as an FEI Athlete Representative?
2. What is the most important job of an FEI Athlete Representative?
3. What would you like to achieve for driving athletes if you are elected?
4. What are the biggest challenges for driving world at the moment?
5. What would you like to improve in the sport of driving?
6. How would you make sure athletes from all levels are heard?
7. How would you stay in touch with athletes and listen to their ideas and concerns?
8. Why should athletes vote for you?
9. What is one thing you would like to improve in driving?
10. What is your message to the athletes who will be voting?

I decided to apply because I think it's a really crucial moment for our discipline ...

The world economic situation is likely to have a negative impact on the future of our sport...

I am very worried about the future not of the top drivers but about the reality of our competitions where the user based mainly on amateurs ...

In our sport, unlike Olympic disciplines, few people live from this activity, but even if they commit themselves with incredible perseverance, they have to carve out time for their work and their family to be able to carry on their passion.

An idea in order to allow a containment of costs for both the competitors and the organising committees could be to transform the first visit of the horses instead of walking the day before the dressage test and do it on the day of the attached dressage as it happens for the cone test.

In this way everything would be shortened by one day both for the c.o. and for the competitors bringing a great economic saving and a person who works could lose fewer working days and could participate in more competitions ...

Another idea could be to value young people more .. our future ... trying to give more feedback on social media by the FEI to the kids to give an idea of young sport...

I would also propose a better location of the dates of the world / European championships more diluted in the season... not piled up or even overlapping to allow the right and prolonged media attention and to also allow drivers of different categories to be able to assist in the form of trainers or public appear ...

The issue for para driving is very important... a better division of categories .. can't an athlete with an arm problem compete with an athlete with a leg problem.. the problem affects too different ways in driving ...

To summarise, I find it very important to approach the average users of our races and minor competitions to prevent our sport from becoming a discipline only for top drivers but that the discipline is represented by many drivers who can give hope for the future.

All drivers must be able to talk to their contact person even through social media or media platforms ... each nation should have its own contact person who is the FEI contact person because the problems in the various countries are often different.

Last important note the welfare for our horses that is real not only exploited to the bucket of water in the box

The race fields are suitable the difficulties and the efforts of the marathons be honest ... that the voice of the riders is valid when the risk for our horses is excessive ... ruining a horse takes a moment to fix it takes time money and luck.

In short, they should vote for me because I am one of them ... I have dedicated my life to this sport and I would be very sorry to see this passion of mine in crisis ...
